

RITESH PAWAR

Aspiring Software / AI Developer

Pune, IN 410401 | 9067688169 | riteshpawar940366@gmail.com | linkedin.com/in/riteshpawar94

SUMMARY

Aspiring Software/AI Developer with hands-on experience in Python, Generative AI, NLP, REST API integration, and desktop automation. Built Charlo, an AI-powered desktop assistant that combines LLM integration and natural-language understanding with real-world automation. Combines a Computer Engineering background with practical project work and transferable experience in client-facing, data-driven roles. Eager to contribute to and grow within an innovative software or AI engineering team.

SKILLS

Languages & Core: Python, SQL, Java

AI / ML: Generative AI & LLM Integration, Natural Language Processing (NLP), Exploratory Data Analysis, Feature Engineering, Model Evaluation

Development & Integration: REST API Integration, Desktop Automation, Modular Application Architecture

Other: Data Analysis & Reporting, Client Communication, Git

PROJECTS

Charlo — AI-Powered Desktop Assistant

- Built a Python-based AI assistant that uses Generative AI/LLM integration and NLP to understand and act on natural-language voice/text commands.
- Integrated REST APIs and external services to fetch real-time information (e.g., weather, web search) and control it through a single conversational interface.
- Designed a modular architecture so new skills/automations (opening apps, managing files, running system tasks) can be added independently.
- Automated everyday desktop tasks, reducing manual steps for common workflows.

Number Guessing Game — Java

- Built a console-based number guessing game in Java using loops, conditionals, and random number generation.
- Implemented user input handling with Scanner and real-time feedback on each guess.

EDUCATION

Bachelor of Engineering in Computer Engineering

July 2026

Sharadchandra Pawar College of Engineering and Technology, Baramati, India

INTERNSHIP

Data Science Intern

Dec 2024 – Jan 2025

ProAzure Software Solutions

- Performed data cleaning, preprocessing, and visualization to improve data quality for analysis.
- Conducted exploratory data analysis (EDA) on multiple datasets to surface trends and patterns.
- Contributed to building and evaluating machine learning models, improving predictive accuracy.
- Applied feature engineering techniques to optimize model performance.
- Used SQL for data extraction and manipulation to support analysis workflows.

WORK HISTORY

Sales Executive

April 2026 – Current

FlexifyMe, Pune, India

- Analyzed sales data using spreadsheets and CRM tools to identify trends, adjust strategy, and improve performance.
- Identified and pursued new business opportunities through market research and networking.
- Delivered product demonstrations that translated technical value propositions for prospective clients.
- Collaborated with the marketing team to develop targeted, data-informed promotional materials.

Sales Associate

March 2025 – March 2026

Altruist Technologies Private Limited, Pune, India

- Managed telecalling for loan and EMI products, generating leads and consistently meeting monthly targets.
- Built and maintained strong client relationships to improve customer satisfaction and retention.
- Processed transactions accurately using point-of-sale systems, ensuring efficient operations.
- Maintained visual merchandising standards, contributing to an improved store environment.
